

Visit us at the Valve World Expo!

From December 3rd to 5th, the Valve World Expo in Düsseldorf will be the gathering place for the who's who of the industrial valve industry – and we'll be right in the middle of it! You'll find us in Hall 3, centrally located at Stand C72.

On approximately 50 square meters, we will showcase the highlights of our current product range, including our new lined ball valves as well as stainless steel globe valves and gate valves. Discover the innovative automation solutions from our in-house department, which can also provide custom designs tailored to your specific requirements.

Experience the broad range of services offered by our specialized company, **ASA Armaturen Service Alms**, live at the expo. Alongside customized modifications and valve adjustments, ASA also manufactures flow sight glasses and heating jackets.

We are also pleased to have our partner, the Italian valve manufacturer **Valvosider**, at our stand.

We look forward to welcoming you!
